

# GENEALOGY FINDINGS

## What breeds make up Nick 3210?

The chart below summarizes the predicted last three generations of Nick 3210's ancestry based on the Wisdom Panel ancestry analyses performed on Nick 3210's DNA data. The summary of the data supports the observation that Nick 3210's genetic profile may match that of a purebred American Staffordshire Terrier, however, it is not completely conclusive. This may occur with dogs from a foreign or rare family line which have been bred away from the purebred American Staffordshire Terrier families represented in the Wisdom Panel database or it may be that Nick 3210 has some recent ancestry from other breeds.
